ENDUROFLEX ROOF EDGE DRIP ANGLE PLUS 60/60

TECHNICAL DATA SHEET

Enduroflex TDS Nov 2023

DESCRIPTION

The Enduroflex Roof Edge Drip Angle is a pre-manufactured profile that terminates the waterproofing membrane at the highest edge of the roof in a professional, watertight and wind-uplift resistant manner.

The profile is used on top of roof edge curbs of wooden and concrete flat roofs.

TYPE	A	B
60/60	60	60

ADVANTAGES

- Strong, stable and durable profile that increases the durability of the waterproofing system.
- Increases the bonding of the waterproofing to the edge of the roof-deck.
- Special corner design to prevent penetration by horizontal driven rain.
- Available with connection plates, internal and external pre-manufactured welded corners.
- Wind uplift resistant.
- Corrosion resistant (Anodizing or painting is a popular way to enhance corrosion resistance)
- Continuous aesthetical finish.
- Provides a dripping point of 15mm off the wall to prevent water stains to the wall.

CHARACTERISTICS

- Material - Aluminum 2500
- Length per profile - mm
- Width (visible, outside) - 60 mm
- Fastening zone - 45 mm
- Dripping edge - 15 mm from wall

INSTALLATION

- The waterproofing cap sheet is installed on top of the roof edge curb.
- The profile is fastened at the roof edge on top of the cap sheet.
- The profile and its fixings are covered by another piece of cap sheet.
- Always refer to the manufacturer's detail drawing.
